

CASE STUDY DARTMOUTH GOLF CLUB SPA & POOL REFURBISHMENT

TOTUS

Sector: Leisure

Client: Dartmouth Golf Club

Scope of Works: Mechanical and Electrical Refurbishment

Contract Value: Circa £180k

A state of the art spa, pool and fitness suite was installed. The spa includes 3 treatment rooms, a relaxation room, nail & pedi bar and the only Rasul in this part of Devon. The pool area has a jacuzzi, showers and sauna, including an integrated system to release essences, and steam room as well as massage jets in the pool itself.

Bespoke features included Barrisol ('stretch') ceiling over the swimming pool, joinery units within treatment rooms and a handcrafted reception desk.

The project had a tight turnaround time and limited space to work with, so it required our team to work effectively with others involved.

Due to the required programme of works the swimming pool had to be filled with work still on-going, creating a health and safety hazard. We therefore sourced a lifebuoy, courtesy of Dartmouth Chandlery, to ensure safety in the unlikely event of someone falling into the pool.

Services Provided:

- Ventilation
- Hot and Cold Water Services
- BMS Automatic Controls
- Life Systems
- Above Ground Drainage
- Power and Lighting
- Structured Wiring
