

# CASE STUDY EXETER SCHOOL – MULTIPLE PLANTROOM REPLACEMENTS

# TOTUS

**Sector:** Education

**Client:** Exeter School

**Scope of Works:** Design, Mechanical & Solar Thermal Services

**Contract Value:** £180k

Totus were initially engaged by the client to complete a full survey and produce detailed proposals accompanied with a complete cost plan. Totus were then engaged as Main Contractor and completed a full design and completed the project in a 6 week programme over the summer of 2011.

The project consisted of a boiler replacement (3no Boilers totalling 225kw) however, a bespoke design by Totus incorporated a solar thermal array which initially heats the domestic hot water but once met provides solar heating to the pool water. This reduces the Schools energy consumption (and carbon footprint) in two key areas.

## Services Provided:

- Heating & Gas Installation
- Hot & Cold Water Services
- Solar Thermal Array
