

CASE STUDY THE COVE (MACMILLAN CENTRE), TRELISKE HOSPITAL

TOTUS

Sector: Health

Client: Royal Cornwall Hospitals Trust

Scope of Works: Mechanical and Electrical New Build

Contract Value: £156K

The building is a purpose built facility to provide patients with a comfortable environment to obtain information about the illness diagnosed to them. It also gives them a place to go and discuss any issues or concerns they have in a comfortable and friendly atmosphere away from the clinical environment of the hospital. The building also contains a meeting place/café where patients can meet others and share their experiences and to help others. The building is partly run by volunteers as well as dedicated professional supportive staff.

The services have been installed to service a very highly furnished building to provide a comfortable and warming environment for people who are in a vulnerable position due to their illness.

Services Installed:

- Lighting & Emergency Lighting
- Small Power
- Fire Alarm
- LTHW Heating System
- Natural Ventilation as well as Mechanical Ventilation and Extraction Systems
- Domestic Hot and Cold Water Services
- Security, Personal Attack Alarms
