

**Sector: Historical**

**Client: Torre Abbey**

**Scope of Works: Mechanical and Electrical Services Refurbishment**

**Contract Value: £315k**

Totus were employed to install the mechanical and electrical services within the 2<sup>nd</sup> Phase of the Torre Abbey refurbishment within the South range.

Due to the Grade I listing and the nature of the building, Operatives were carefully selected for their experience working within buildings of a historic nature and the care in which they needed to carry out their works. Each work operation was planned in advance; ensuring that all service routes and fixing details were previously agreed

with the design team for onward submission with English Heritage as necessary. Our Engineers and Operatives were informed through briefings of the historic nature of Torre Abbey and strict quality control was maintained through our QMS system was adhered to.

This project was successfully completed in March 2013.
